ABOUT US

At Bio Blok, we are focused on redefining the way people experience houses.

We aim to provide everyone with a qualitatively different living experience.

One where being indoors is as free, open and fresh as outdoors.

We manufacture natural building materials without toxic additives, allowing you to truly breathe indoors. And we do it while being carbon negative.

PROBLEM

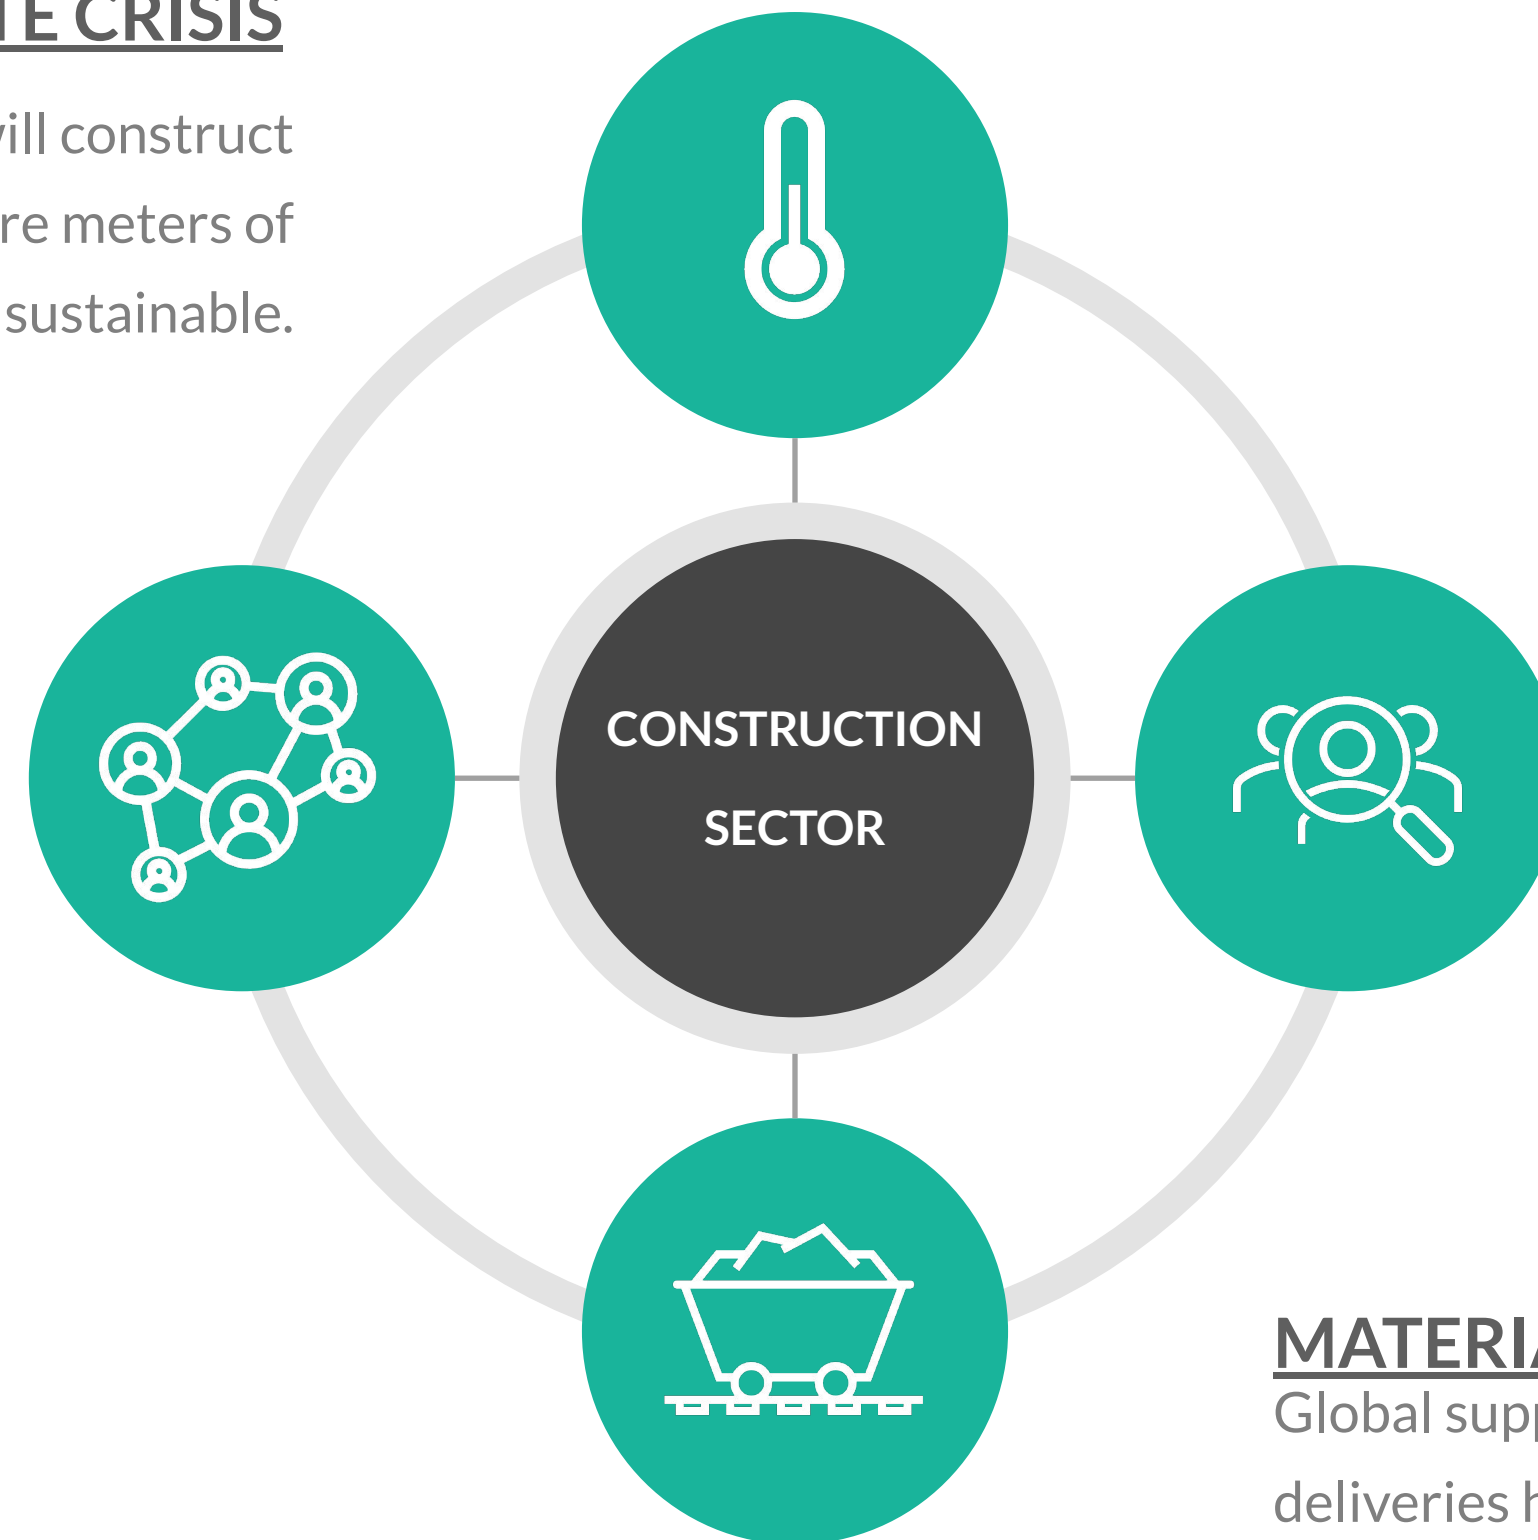

Construction sector contributes 36% of all CO2 emissions and 40% of all energy use – this needs to change!

CLIMATE CRISIS

By 2060 it is projected we will construct more than 230 billion square meters of new buildings. They must be sustainable.

BUSINESS MODEL

Low profitability, shortages of skilled workers and resistance to change are the main features of construction sector, which manifest in productivity stagnating for the last 50 years.

MARKET GAP

Lack of competitively priced, ecological and harmonized construction materials offering an alternative to existing solutions.

MATERIAL COSTS

Global supply chains and “just in time” deliveries have been proven to be vulnerable to disruption, causing shortages and price hikes, especially in construction materials.

OUR SOLUTION

Hemp Lime insulation

SUSTAINABILITY

We offer a carbon negative house building solution.

CLOSING THE GAP

Our product is cost effective, tested in real world applications and quick to install.

COST CONTROL

Short supply chains, integration of suppliers within the business model, local manufacturing.

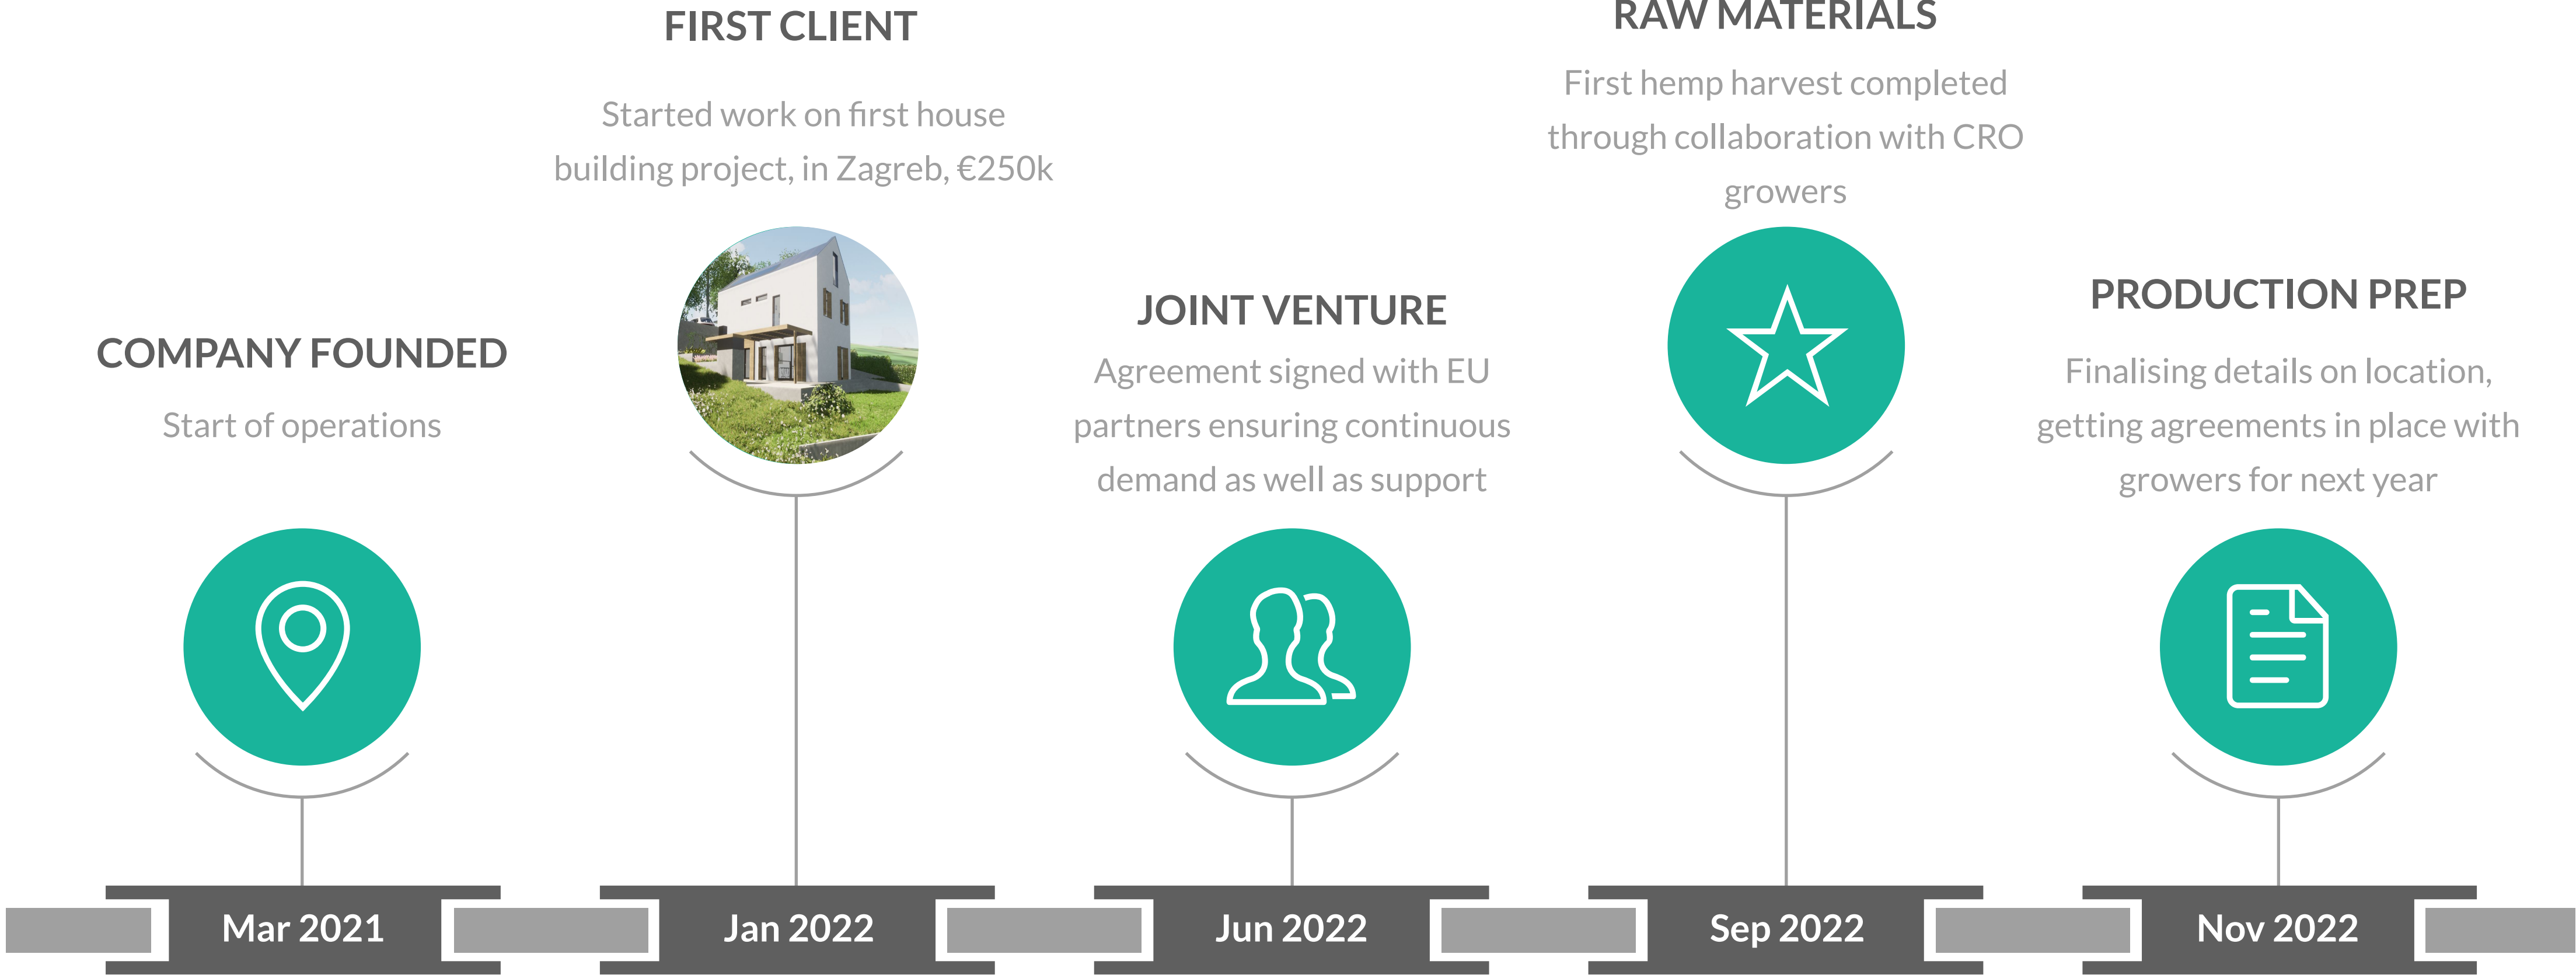

LEVERS OF CHANGE

Utilise prefabrication, implement modular design, focus on continuous training and improvement, invest in advanced automation

TRACTION

The story so far

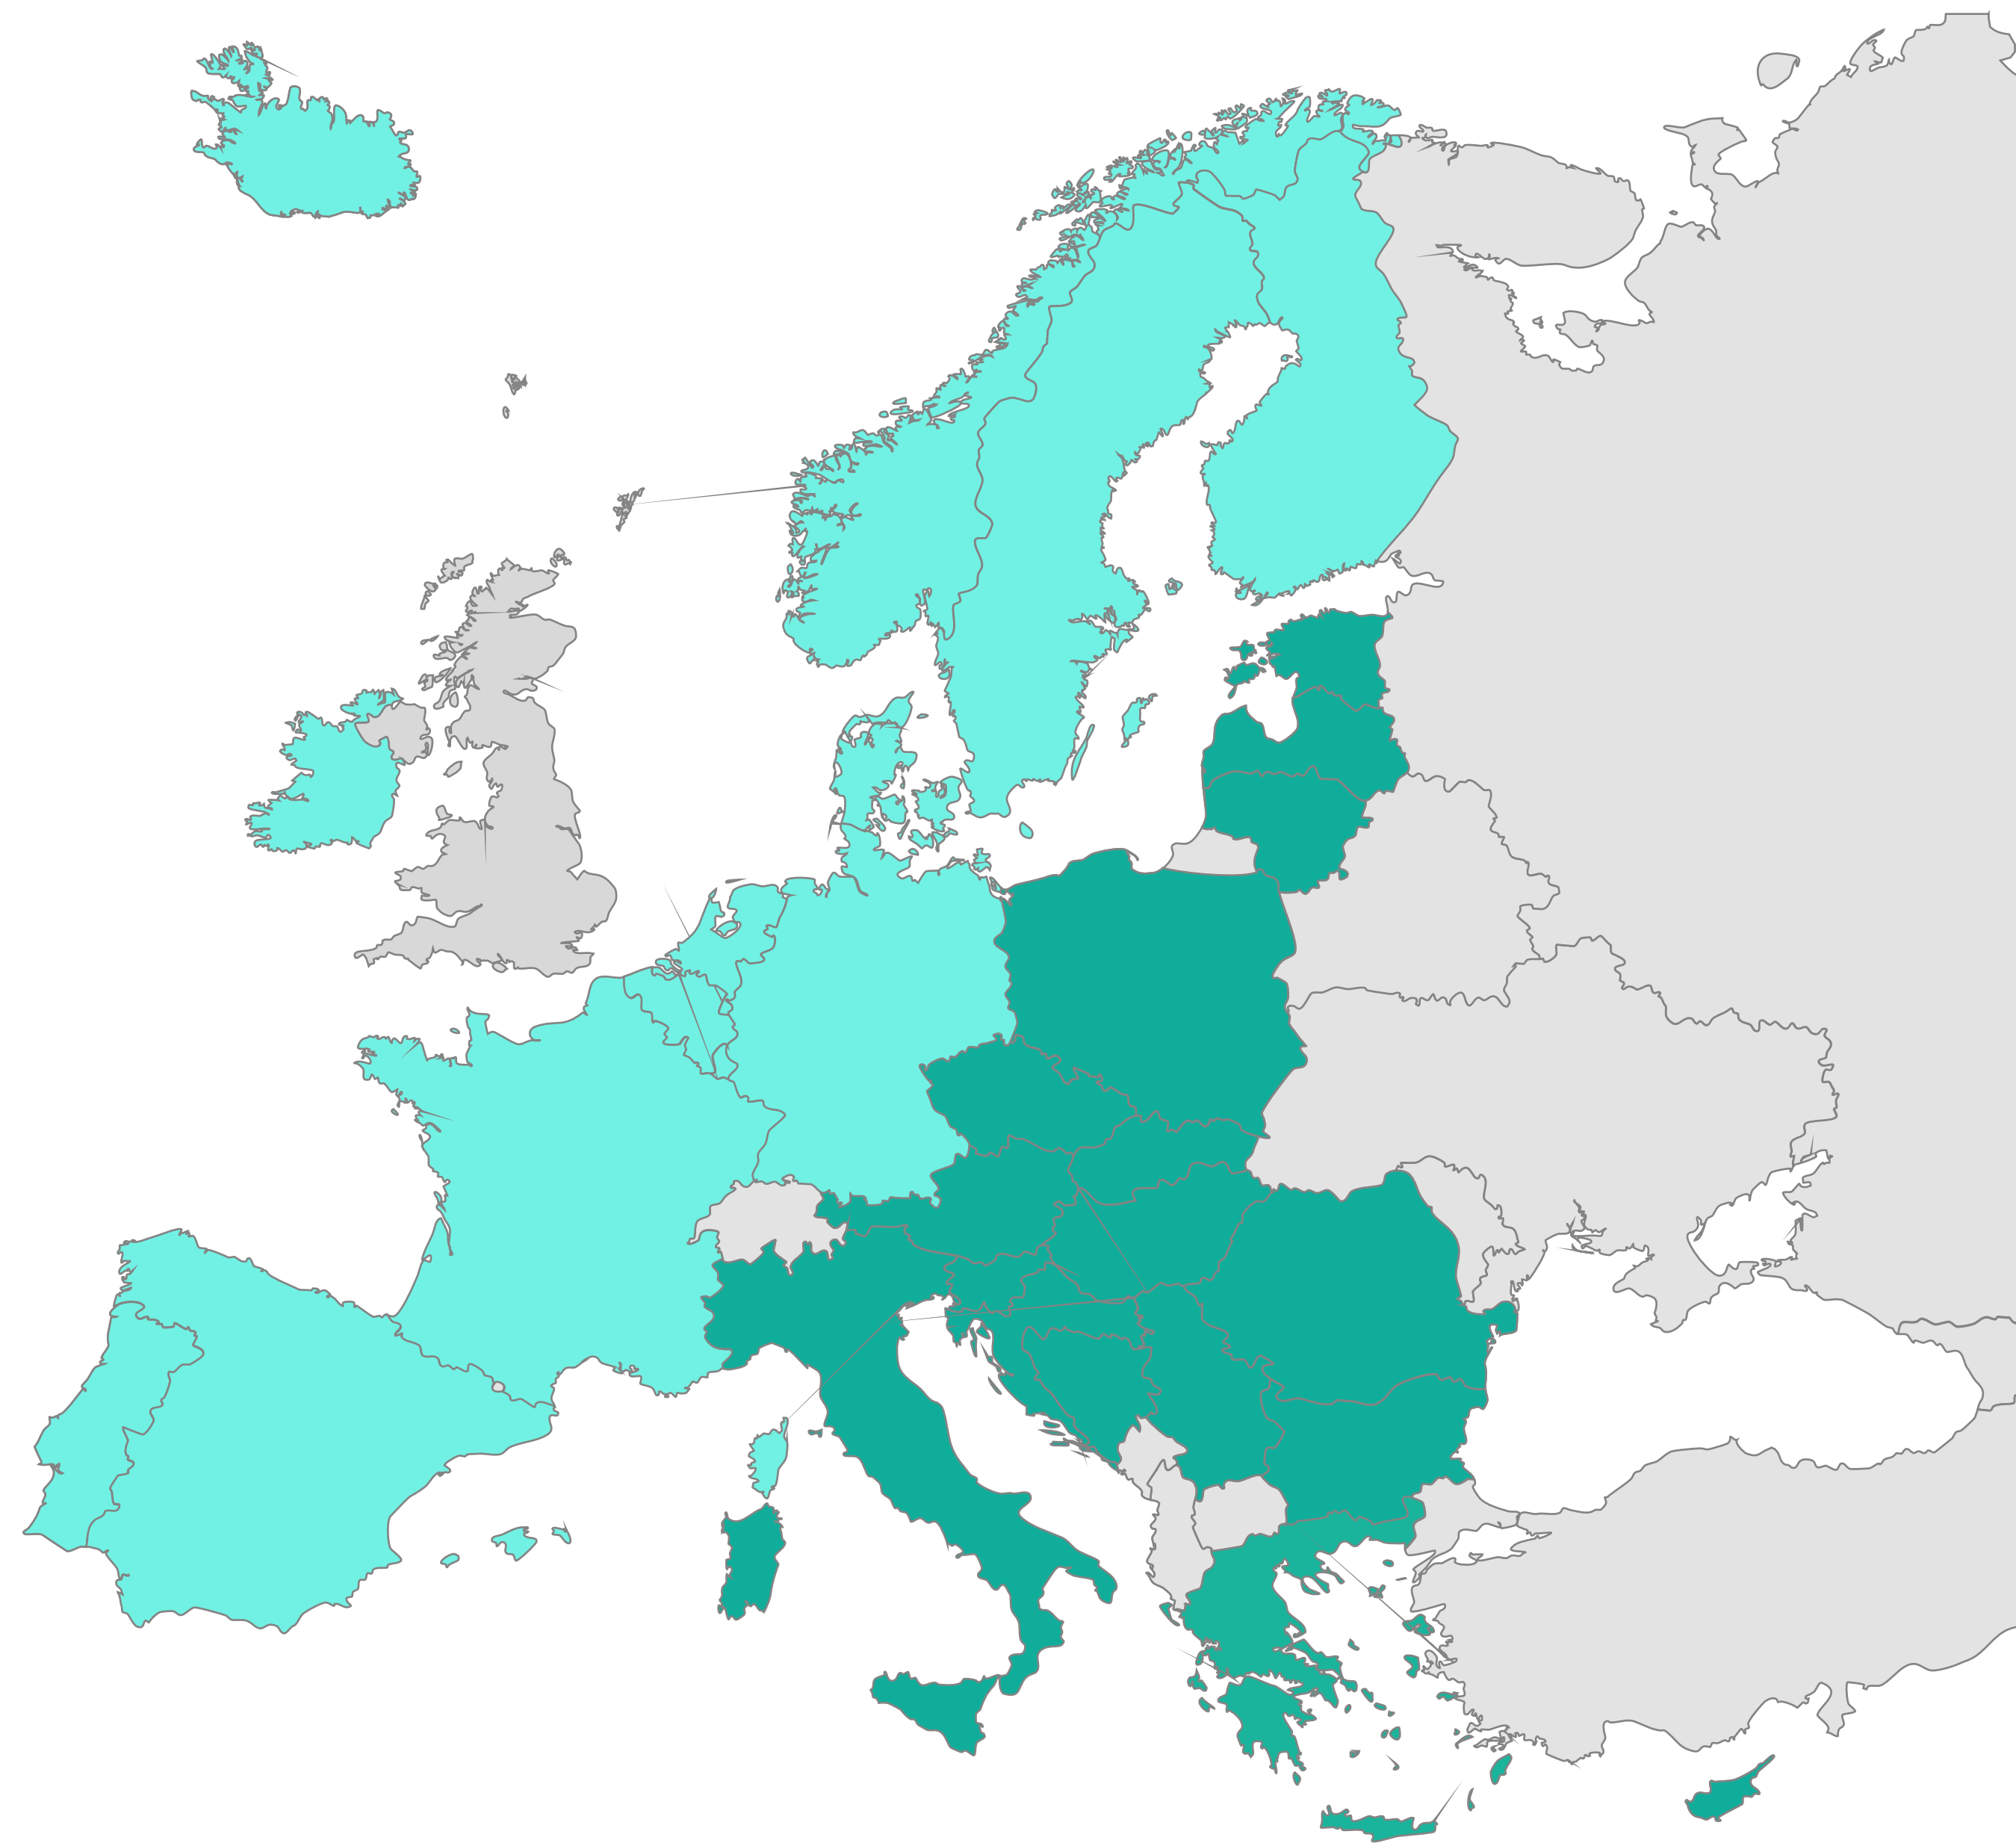

BUSINESS MODEL

Insert your short subtitle here to explain a little about title

MARKET OVERVIEW

- TAM - €850 bn - EU construction market
- SAM - €10 bn - Sustainable prefab market (2018)
 - Direct sales €3.5 bn (C&EE)
 - Export €6.5 bn (W&NE)
- SOM - €95 M - Hemp based construction
(for Croatia, Slovenia, Serbia, Austria, BiH & Hungary)

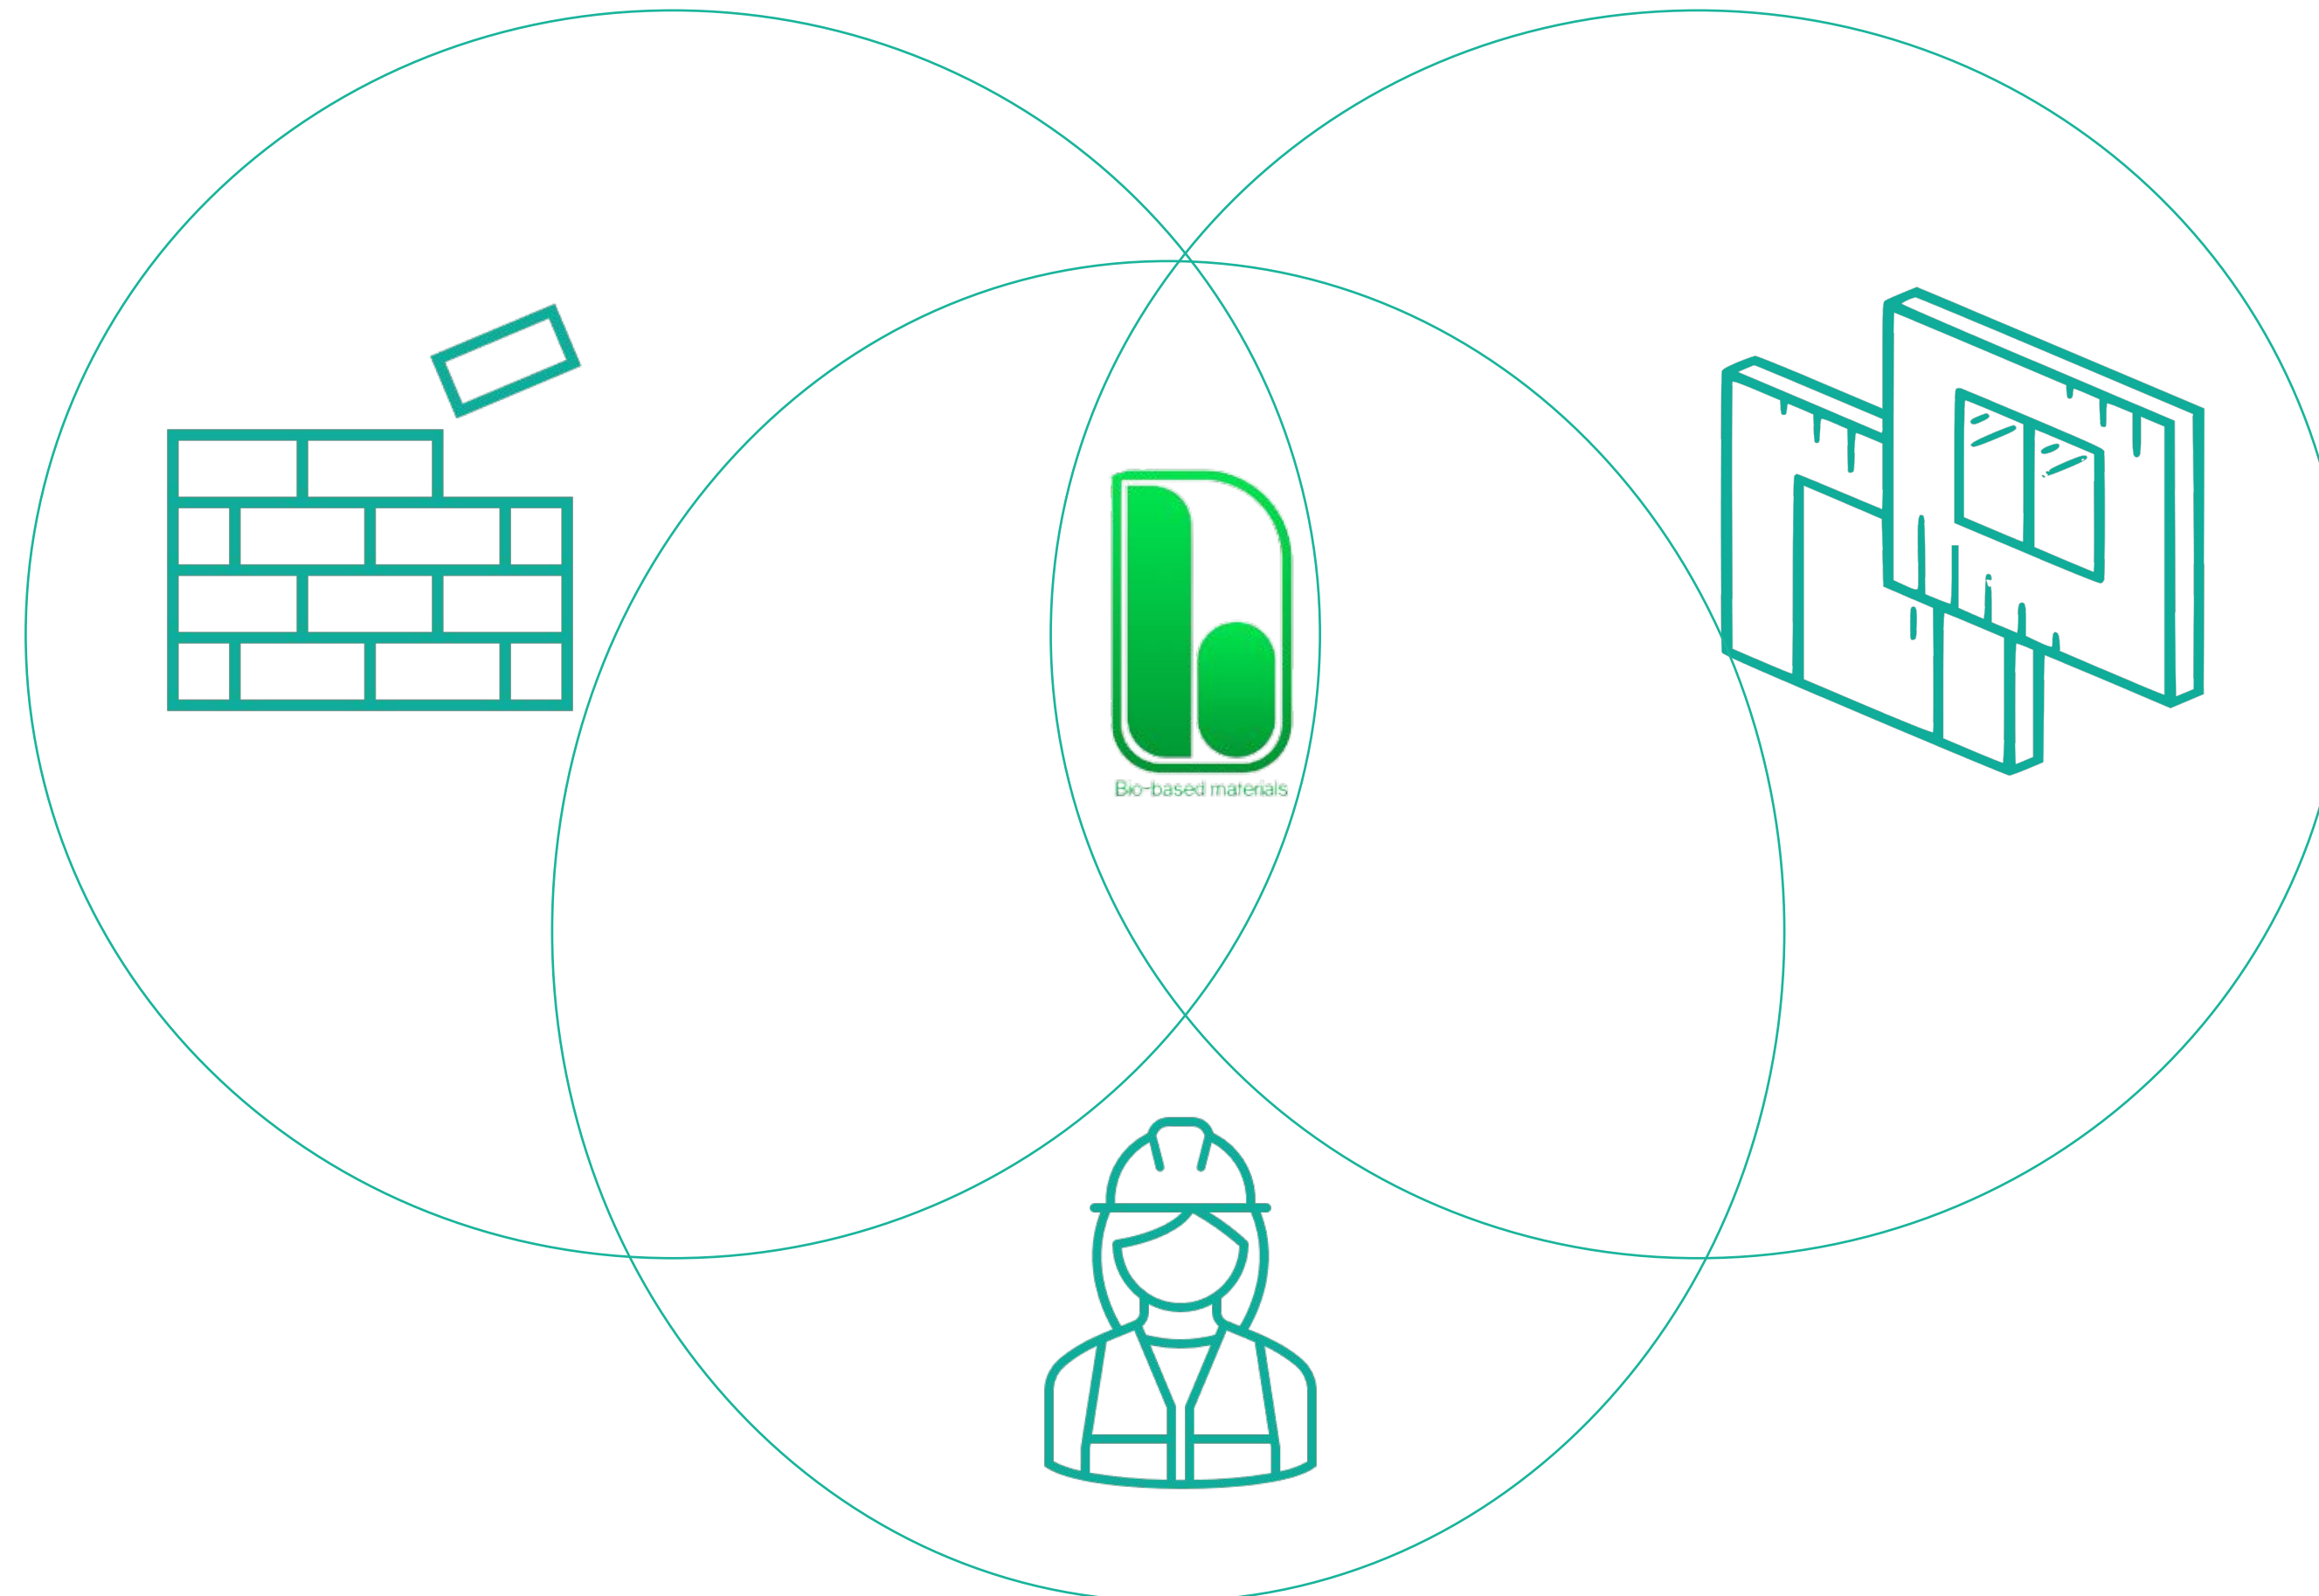

COMPETITION

Our main competitors come from conventional construction as we're ultimately going after their market share

CONVENTIONAL MATERIAL MANUFACTURERS

Offering a tried and tested method people trust at a competitive price (usually). We are taking their market share.

PREFAB CONSTRUCTION COMPANIES

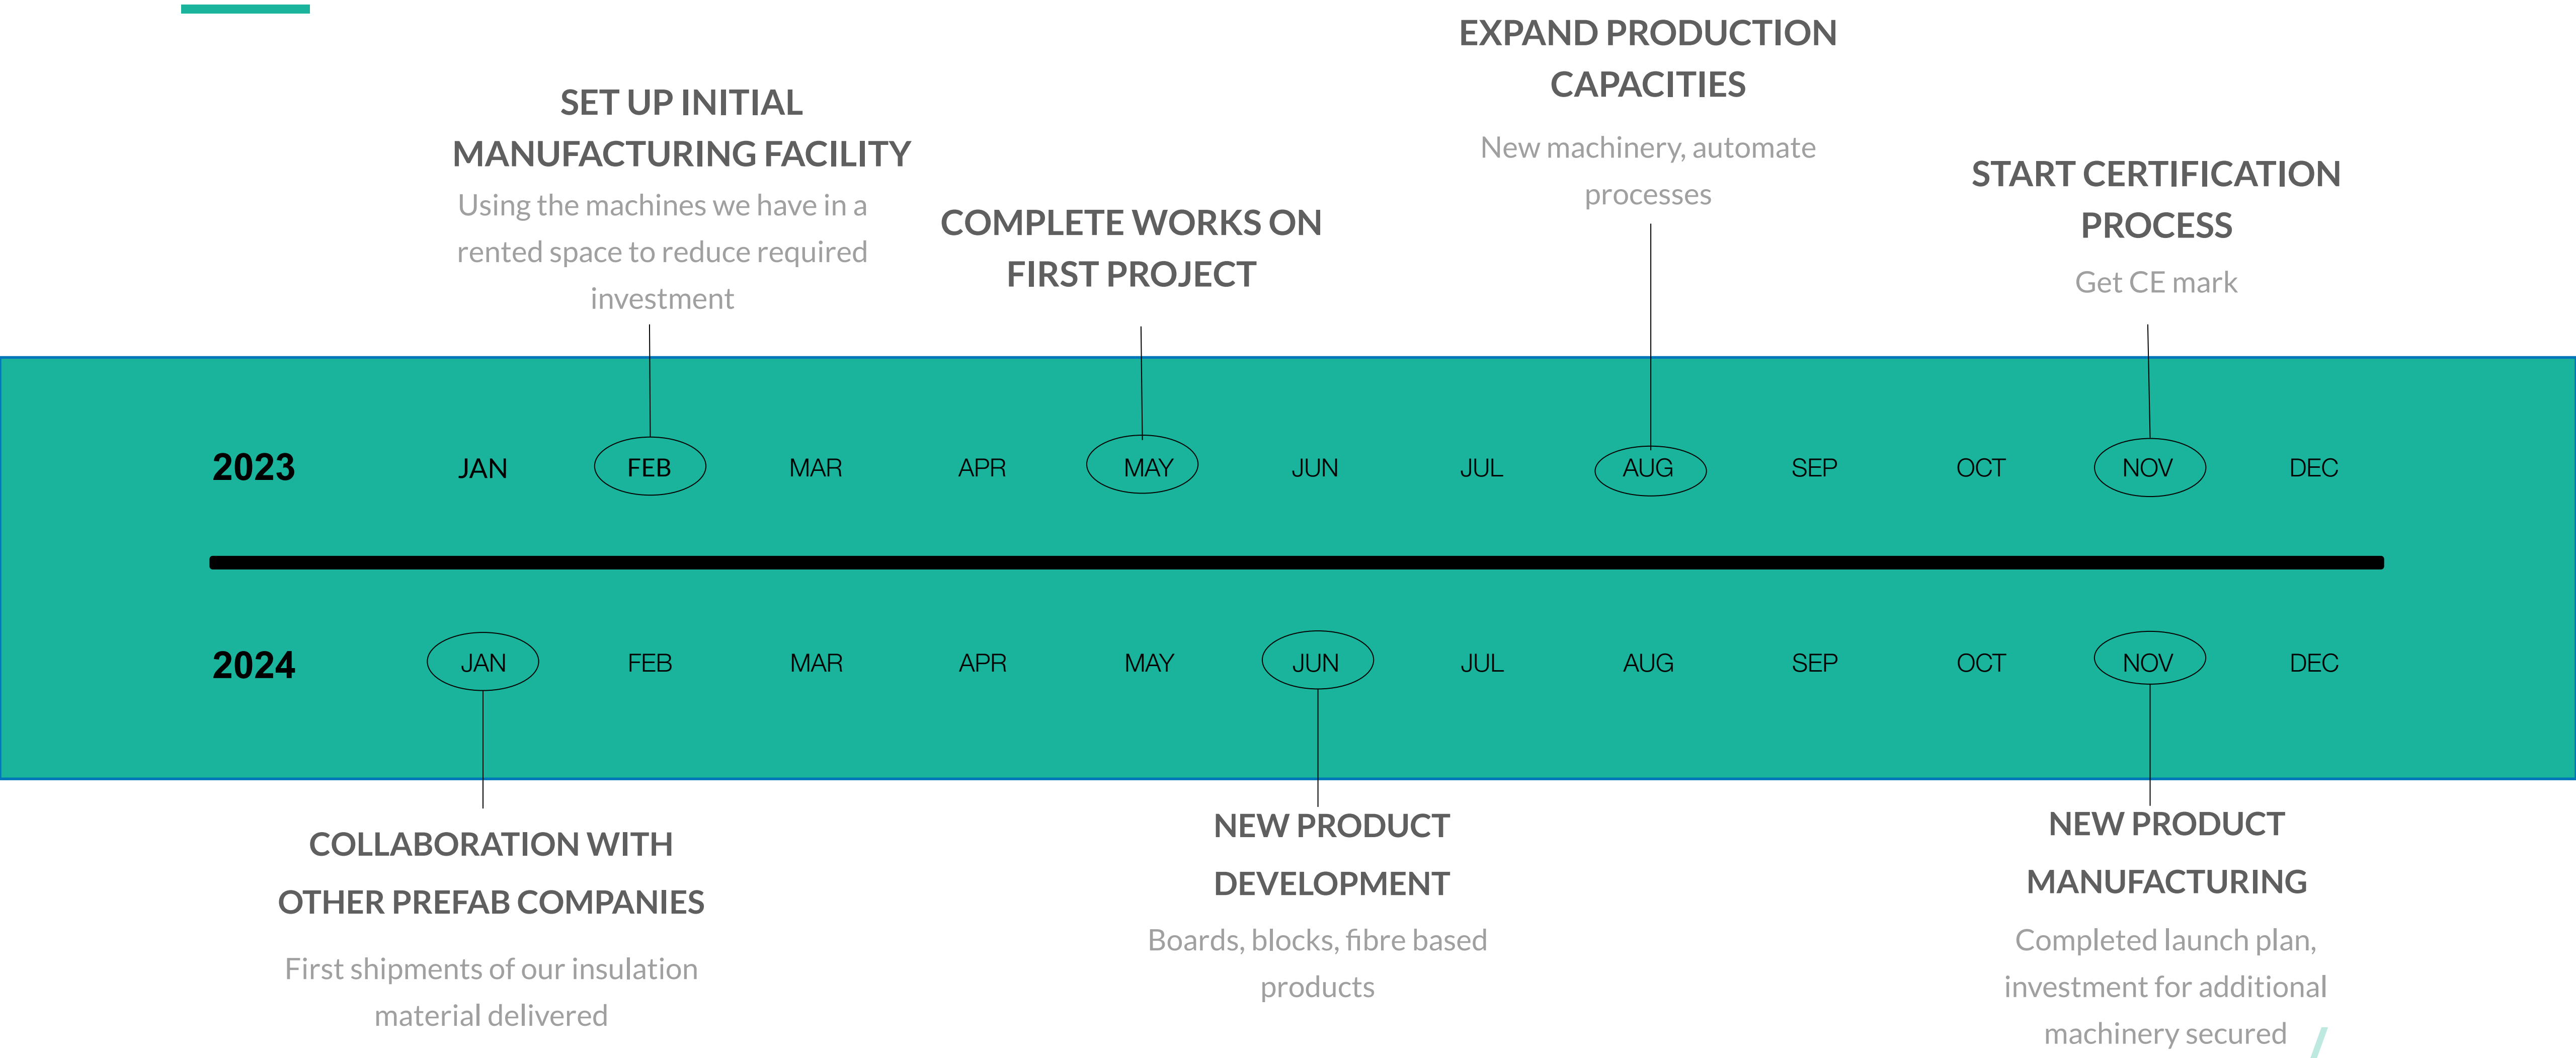

Newer construction method, old materials. New, growing market which leaves more room for us.

SME CONVENTIONAL CONSTRUCTION CONTRACTORS

Offering a tried and tested method people trust at a competitive price (usually). Taking their market share.

FUNDING

SUMMARY

At Bio Blok we believe in delivering a sustainable future for everyone, not just those who can afford it. That is why we utilise the latest building technologies and techniques, to reduce cost and achieve a high-quality end product. Our approach challenges the conventional wisdom of the construction sector. With our market knowledge and wide network of collaborators, we believe we can bring about the necessary changes to the construction industry.

THANK YOU FOR YOUR ATTENTION

MARKET ANALYSIS

Porter's 5 Forces for conventional construction

THREAT OF SUBSTITUTES - HIGH

- Cross Price Elasticity for materials is HIGH as evidenced by increased interest in alternative materials in early 2022, during the global increase in prices
- Switching cost is moderate, especially in prefab construction

THREAT OF ENTRY – MODERATE

- Sunk costs – high for BB due to asset specific machinery needed
- Competitive advantage of incumbents is high due to economies of scale, certification and regulation which favours their products – this could change considering ambitious EU Carbon targets and ever more stringent regulations being put in place which will favour sustainable materials
- Retaliation – high chances of retaliation IF support is not given by institutions and investors

BARGAINING POWER OF BUYERS - HIGH
